

As a broadcaster in a small market, I ask that you not pass the proposed 04-232 to require radio stations to record our daily programming. The majority of broadcasters would be penalized for the misjudgement of a few. In small market radio this would put another burden on us. We have to operate with a very limited staff.... each who are already doing multiple jobs. It is difficult enough to get and keep good employees without asking them to add more to their job.
